

BC SCRAP-IT® Program
Emission Testing of Three Families Vehicles

Old Vehicle Scrapped
Vs.
Newer Vehicle Purchased

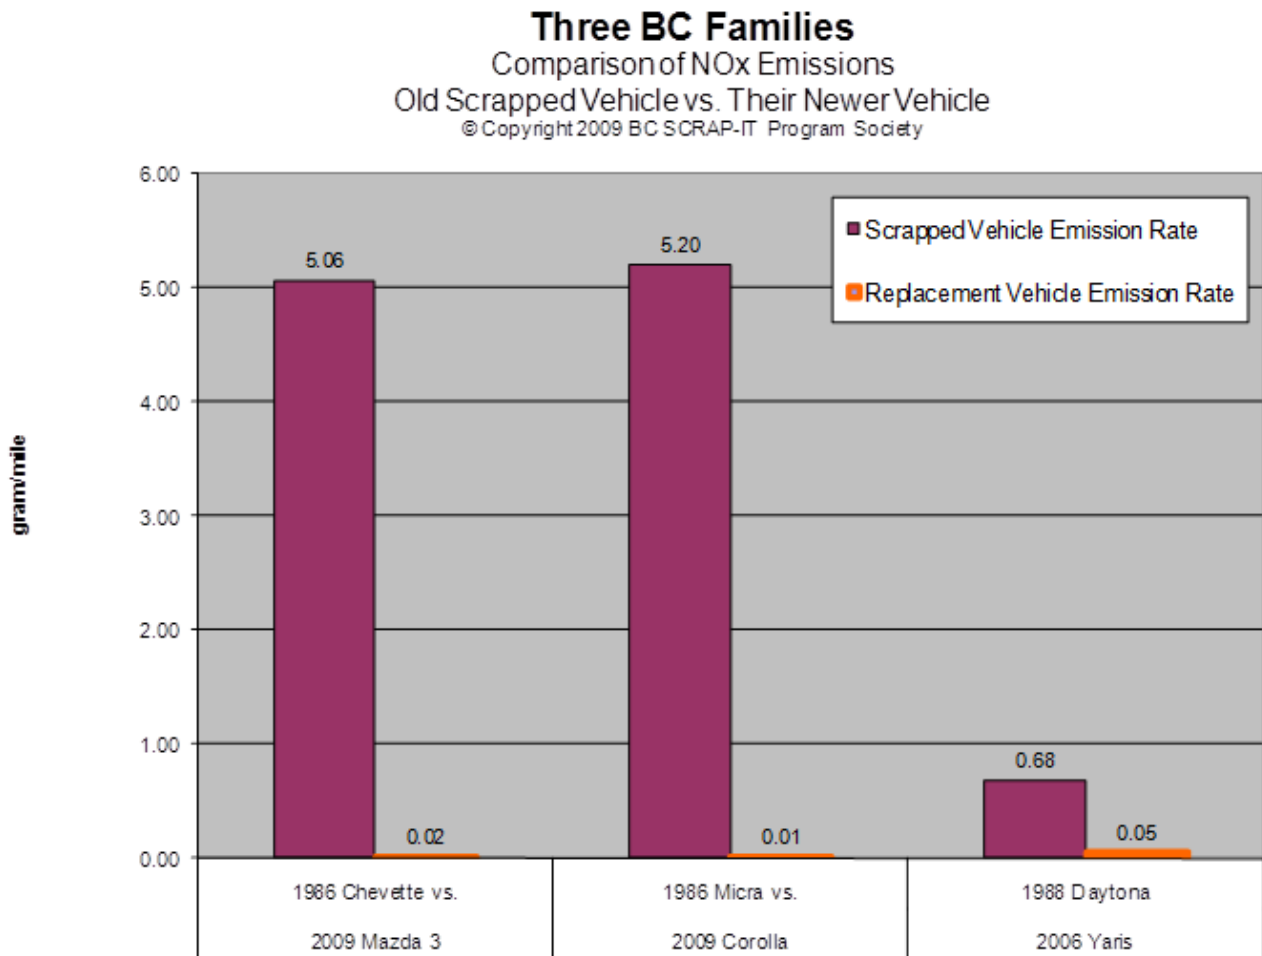

Emission Testing Conducted By
AirCare® Research Centre

September 2009

NOx (Nitrogen Oxide) Emissions – a smog precursor

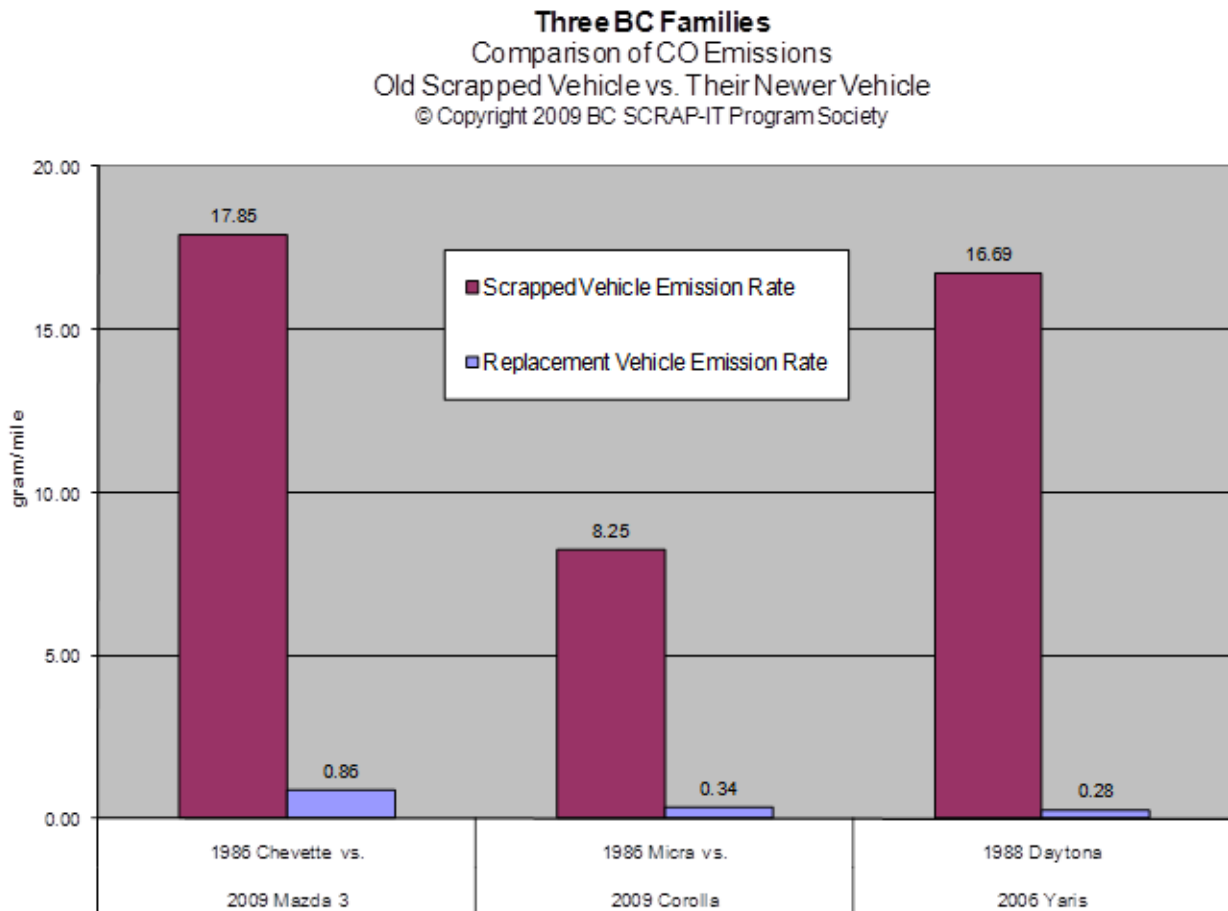

The worst “superpolluter” is 520 times more polluting than a new vehicle

CO (Carbon Monoxide) Emissions – a health hazard

The worst “superpolluter” is 60 times more polluting than a new vehicle

HC (Hydrocarbon) Emissions – a smog precursor and health hazard

The worst “superpolluter” is 58 times more polluting than a new vehicle
